Institute of Food Technologists

The Institute of Food Technologists is a professional society of scientists, engineers, educators, and executives in the field of food technology. Food Technologists are professionals who apply science and engineering to the research, production, processing, packaging, distribution, preparation, evaluation, and utilization of foods. Individuals who are qualified by education, special training or experience are extended an invitation to join in professional association with the select group of the food industry's scientific and technological personnel who are Institute members. Membership is worth many times its modest cost, reflecting positive benefits, stimulation, and opportunities for the individual in his business or profession.

OBJECTIVES

The Institute, as a non-profit, professional, educational society, has several major aims: to stimulate investigations into technological food problems; to present, discuss, and publish the results of such investigations; to raise the educational standards of Food Technologists; and to promote recognition of the scientific approach to food and the basic role of the Food Technologist in industry. All of these activities have the ultimate objective to provide the best possible foods for mankind.

ORGANIZATION AND PROGRESS

Organized July 1, 1939, at Cambridge, Mass, with a membership of less than 100, the Institute has grown to more than 14,500. It is worldwide in scope with more than 2,000 of its membership overseas.

QUALIFICATIONS FOR MEMBERSHIP

Professional Members. Any person who meets the following minimum requirements by training and experience in food technology: (1) Bachelor's degree or higher from a college or university in which he has majored in one or more of the sciences or branches of engineering associated with food technology; (2) Five years of professional experience in food technology, for which a master's degree may be presented as the equivalent of one year's experience; a doctor's degree, the equivalent to three year's experience.

Members. Any person active in any aspect of the food industry and who evidences interest in supporting the objectives of IFT. Recent graduates who are completing their experience requirement for Professional Member status.

Student Members. Any person who is registered as a student in an educational institution and who is actively pursuing candidacy for an Associate Degree or higher in one or more of the sciences or branches of engineering associated with food technology shall be eligible for membership as a Student Member. He may remain a Student Member until the end of the calendar year in which he completes his schooling. At the time he receives his degree, a student may convert automatically to Member without obligation for the higher Member dues until the following year.

Fellows. Any Professional Member who has been active for at least ten years and who has been nominated by the IFT Committee on Fellows for outstanding contributions to the field of food science/technology is eligible to be elected a Fellow of the Institute by the IFT Council.

DUES

Professional Members and Members – $25 a year; includes subscription to *Food Technology* and *IFT World/Directory & Guide*; option to subscribe to the *Journal of Food Science* at members' special rate of $10. Student Members – $5 a year; includes subscription to one IFT journal, *IFT World/Directory & Guide*, and option to subscribe to the other journal at $5. Emeritus Members – no dues; includes *IFT World/Directory & Guide*, option to subscribe to either or both journals at $5 each.

PUBLICATIONS

The Institute publishes two journals. *Food Technology*, issued monthly, is the official journal of the Institute. The *Journal of Food Science*, issued bimonthly, is devoted to basic and applied research papers on fundamental food components and processes. In addition, an *IFT World/Directory & Guide* is published annually.

REGIONAL SECTIONS

Where 25 or more members live within commuting distance of a given point, a regional section may be established. Presently, there are 43 regional sections.

DIVISIONS

Where 50 or more members of the Institute have a common interest in a particular broad-based discipline of food technology, they may form a division. There are presently 11 divisions serving the areas of Carbohydrates, Food Engineering, Food Packaging, Food Service, Microbiology, Muscle Foods, Nutrition, Quality Assurance, Refrigerated and Frozen Foods, Sensory Evaluation, and Student.

STUDENT CHAPTERS

An IFT Student Chapter certificate may be granted to a group of students enrolled in the food science and technology curriculum in a particular school who have organized to form a student club. There are 27 student chapters.

AFFILIATE ORGANIZATIONS

Affiliate certificates may be granted to food technology organizations outside the U.S.A. There are currently nine chartered affiliate organizations.

ANNUAL MEETINGS

An Annual Meeting of the Institute provides a specially-organized technical program, awards program, and industrial exhibit of equipment, services, processes and ingredients. The program is designed to emphasize current trends and technological developments. Special guest speakers are invited.

AWARDS

The institute presents the following awards, usually annually:

NICHOLAS APPERT AWARD. Purpose of this award (medal furnished by the Chicago Section, and $1,000 by IFT) is to honor a person for pre-eminence in and contributions to Food Technology.

BABCOCK-HART AWARD. Purpose of this award ($1,000 furnished by the Nutrition Foundation and a plaque by IFT) is to honor a person for contributions to Food Technology that have improved public health through some aspects of nutrition or more nutritious food.

IFT INTERNATIONAL AWARD. Purpose of this award (engraved silver salver furnished by Australian Institute of Food Science and Technology and $1,000 by IFT) is to recognize an IFT Member for promoting international exchange of ideas in Food Technology.

IFT FOOD TECHNOLOGY INDUSTRIAL ACHIEVEMENT AWARD. Purpose of this award (plaques to company and individuals) is to recognize and honor the developers of an outstanding new food process and/or product representing a significant advance in the application of Food Technology to food production, successfully applied in actual commercial operation.

WM. V. CRUESS AWARD FOR EXCELLENCE IN TEACHING. Purpose of this award (medal furnished by the Northern California Section and $1,000 by IFT) is to recognize the teacher's role in Food Technology advances.

SAMUEL CATE PRESCOTT AWARD FOR RESEARCH. Purpose of this award ($1,000 and plaque furnished by IFT) is to recognize a research scientist 35 years of age or younger who has demonstrated outstanding ability in Food Science or Technology research.

SCHOLARSHIP/FELLOWSHIP PROGRAM

To attract and encourage students in the field of food science and food technology, the Scholarship/Fellowship program is offered to worthy and deserving students, primarily on the basis of scholastic ability.

IFT sponsors 20 $500 awards to sophomores and entering freshmen.

Nineteen Junior/Senior Scholarships and 10 Graduate Fellowships, ranging in amount from $4,000 to $1,000 annually, are sponsored by various food companies and IFT and administered by IFT. Details are available in the booklet, *IFT Administered Fellowship/Scholarship Program – 1977–1978*, available from IFT's Scholarship Department.

Secondary Services

Everyone knows about the International Food Information Service's *Food Science and Technology Abstracts* (FSTA), a monthly compilation of abstracts in 19 subject areas gleaned from more than 1,200 journals from 50 countries.

However, in addition to publishing FSTA, IFIS also has what are known as "Secondary Services" which subscribers can avail themselves of. Here is a list of these services:

CURRENT AWARENESS SERVICE

- Monthly searches of FSTA
- Personalized, computer-assisted service
- Information available in three output formats
- Information selected to match your requirements on any aspect of food science and technology
- Cost from £10 per year for references; £15 per year for abstracts

FOOD ANNOTATED BIBLIOGRAPHIES (FABS)

- Selected abstracts from FSTA on important, specialized aspects of food science and technology. Subjects range from emulsifiers and stabilizers to new sources of protein and heatable packs
- Prices range from £2 to £11 per bibliography

MAGNETIC TAPES

- Contain all information in FSTA plus bibliographic data, abstracts, author, and subject indexes
- Seven- and nine-track IBM tapes available
- Costs about £1,200 per year

RETROSPECTIVE SEARCH SERVICE

- More than 75,000 documents in FSTA searched
- State-of-the-art or "quicky" telephone requests accepted
- Annual contracts with discount
- Information available in three outpost formats
- Searches conducted by qualified food science graduates
- Cost from £5 per volume of FSTA for references; £7.50 per volume for abstracts

PHOTOCOPYING SERVICE

- All journal articles abstracted in FSTA available promptly; output from retrieval services at 40p per article
- Cost 7p per page for single orders
- Deposit account service

(Prices given are in British pounds)

IFIS is sponsored by Commonwealth Agricultural Bureau, Institut für Cokumentationswesen, Institute of Food Technologists, Centrum voor Landbouwpublikaties in Lanbouwdocumentatie, and Zentralstelle für maschinelle Dokumentation

BOOK REVIEW INDEX

Food Technology, Volume 30, 1976

(Month) page number

Acidulants for Food and Beverages. M.H.M. Arnold, (9)102

Advances in Lipid Research. vol. 13 & 14. R. Paoletti & D. Kritchevsky, eds., (10)143

The Almanac of the Canning, Freezing, Preserving Industries. 1975. E.E. Judge & Son, Inc., (4)112

The Almanac of the Canning, Freezing, Preserving Industries. 1976. Edward E. Judge & Sons, Inc., (10) 146

Alphabet Soup. A.D. Selph & B.G. Street, (11)108

Analyse Der Nahrungsfette (Analysis of Food Fats). H. Pardun, (11)111

1975 Annual Book of ASTM Standards. Part 46—End Use Products—Aerosols and Closures; Surgical Implants; Resilient Floor Coverings; Appearance of Materials; Sensory Evaluation; Forensic Sciences. American Society for Testing and Materials, (3)96

Antibiotics and Milk. H. Mol, (5) 238

Basic Food Chemistry. F.A. Lee, (5) 233

Canned Foods—Principles of Thermal Process Control and Container Closure Evaluation. 2nd ed. Food Processors Institute, (2)80

Checkmate to Underdevelopment, F. Monckeberg, (9)103

Chemical Technology. Vol. 8. Edible Oils, Fats & Animals Food Products. J.F. van Oss, (7)97

Chromatography: A Laboratory Handbook of Chromatographic and Electrophoretic Methods. 3rd ed. E. Heftmann, ed., (3)92

Commercial Food Patents, U.S. 1975. H.B. North, (10)144

The Complete Book of Cooking Equipment (revised ed). J. Wilkinson, (12) 76

Cottonseed Chemistry and Technology. K.S. Murti & K.T. Achaya. (7) 94

Current Studies on the Thermophysical Properties of Foodstuffs. International Institute of Refrigeration, (3)94

A Definitive Study of Your Study of Your Future in Food Technology Careers. G.R. Ammerman, (9)102

Dictionary of Packaging: German-English-French-Italian-Spanish-Russian J.P.A. Hoffmann, (5)233

Die Anwendung der Starke in Der Lebensmittelindustrie (Use of Starch in the Food Industry) M. Zobel, (7)100

Dietary Lipids & Postnatal Development. C. Galli, G. Jacini & A. Pecile, eds., (5)236

The Directory of the Canning, Freezing, Preserving Industries 1976-77. 6th biennial ed. E.E. Judge & Sons, Inc., (8)101

Eat Your Heart Out—Food Profiteering in America. J. Hightower, (3) 95

Elementary Food Science. J.T. Nickerson & L.J. Ronsivalli, (10)174

Encyclopedia of Food Technology. A.H. Johnson & M.S. Peterson, (4) 112

Fabricated Foods. G.E. Inglett, (7) 100

Fenaroli's Handbook of Flavor Ingredients. Vols. 1 & 2. 2nd. ed. T.E. Furia & N. Bellanca, eds., (4)112

Fishery Products. R. Kreuzer, ed., (7) 98

Food Additive Tables. E.J. Bigwood, M. Fondu, G. Art & H. Van Gindertael, eds., (5)239

Food Colorimetry: Theory and Applications. F.J. Francis & F.M. Clydesdale, (5)239

The Food and Health of Western Man. J.L. Mount, (5)231

Food for Life. F.E. Deatherage, (8) 99

Food and Nutrition Research Report of the ARC/MRC Committee. Agriculture Research Council, (1)92

Food Processing Engineering. H.A. Leniger & W.A. Beverloo, (5)235

Food Science and Technology Books. Food Annotated Bibliography No. 47. International Food Information Service, (3)90

Food Yields Summarized by Different Stages of Preparation. R.H. Matthews & Y.J. Garrison (5)237

The Food in Your Future—Steps to Abundance. K.C. Barrons, (5)229

Freeze Drying and Advanced Food Technology. S.A. Goldblith, L. Rey & W.W. Rothmayr, eds., (2)80

Guide to American Scientific and Technical Directories. 2nd ed. B.T. Klein, ed., (10)145

The Guide to Fiber in Foods. B. Kraus, (5)226

Handbook of Enzyme Biotechnology. A. Wiseman, ed., (5)226

Honey. E. Crane, ed. (6)95

Hungry for Profits. R.J. Ledogar, (8) 100

Industrial Mycology. Vol. 1. The Filamentous Fungi. J.E. Smith & D.R. Berry, (3)90

Interaction of Agriculture with Food Science. R. MacIntyre, ed., (5) 236

An Introduction to Agricultural Engineering. L.O. Roth, F.R. Crow, & G.W.A. Mahoney, (12)76

Keeping Food Safe. H. Bradley & C. Sundberg, (7)98

Lipid Chromatographic Analysis. Vol. 1 & 2. 2nd ed. G.V. Marinetti, ed., (10)143

Lipolytic Enzymes. H. Brockerhoff & R.G. Jensen, (4)112

The Man/Food Equation. F. Steele & A. Bourne, eds., (10)148

A Manual of Methods for the Bacteriological Examination of Frozen Foods. L.P. Hall, (7)95

The Measurement of Appearance. R.S. Hunter, (7)95

Meat. D.J.A. Cole & R.A. Lawrie, eds., (7)94

Meat Hygiene. 4th ed. J.A. Libby, ed., (3)93

Microbial Aspects of the Deterioration of Materials. D.W. Lovelock & R.J. Gilbert, eds., (7)113

Microwave Heating. 2nd ed. D.A. Copson, (5)237

Nanogen Index, A Dictionary of Pesticides. K. Packer, (3)88

New International Dictionary of Refrigeration. International Institute of Refrigeration (10)148

Nutrition Canada, 1975. Information Canada, (4)118

Nutrition References and Book Reviews—Revised 1975. Chicago Nutrition Assn., (1)90

Nutrition Technology of Processed Foods. N.D. Pintauro, (4)115

Nutritive Value of American Foods in Common Units. U.S. Government Printing Office, (5)226

Odor Control and Olfaction. J.P. Cox, (10)175

The Organic Constituents of Higher Plants. 3rd ed. T. Robinson, (5) 238

Our Polluted Food: A Survey of the

Risks. J. Lucas, (3)88

Panic in the Pantry: Food Facts, Fads and Fallacies. E.M. Whelan & F.J. Stare, (1)64

The Particle Atlas. 2nd ed. Vol. 1, Principles and Techniques. Vol. 2. The Light Microscopy Atlas. Vol. 3. The Electron Microscopy Atlas. Vol. 4. Handbook for Analyst. W.C. McCrone & J.G. Delly, (7)100

Physiological Effects of Food Carbohydrates. A. Jeanes & J. Hodge, eds., (4)122

Postharvest Biology and Handling of Fruits and Vegetables. N.F. Haard & D.K. Salunkhe, eds., (6)95

Potato Processing, 3rd ed. W.F. Talburt & O. Smith, (3)96

Prevention of Microbial and Parasitic Hazards Associated with Processed Foods: A Guide for the Food Processor. National Academy of Sciences, (2)81

Principles of Food Science. Part 1. Food Chemistry, O.W, Fennema, ed., (11)108

Principles of Food Science. Part 2. Physical Principles of Food Preservation. M. Karel, O.W. Fennema, & D.B. Lund, (11)108

Proceedings of the IV International Congress of Food Science and Technology. Vol. II. IUFoST, (9)102

Proceedings of the IV International Congress of Science and Technology. Vol. IV. IUFoST, (12)74

The Proceedings of the International Food Industries Congress, London May 12th to 16th 1975. Food Trade Press, (10)145

Professional Women and Minorities—A Manpower Data Resource Service. Scientific Manpower Commission, (10)144

Protein and Nutrition Policy in Low-Income Countries. F. Aylward & M. Jul, (1)92

Protein Nutritional Quality of Foods and Feeds. Part 1—Assay Methods, Biological, Biochemical, and Chemical. (Nutrition and Clinical Series), Vol. 1. M. Friedman, ed., (1)90

Quality Control in Food Service. M.E. Thorner & P.B. Manning (12)78

Quality of Horticultural Products. V.D. Arthey, (5)232

The Role of Sucrose in Foods. A. Lachman, (4)119

Sausage and Processed Meats Manufacturing. R.E. Rust, (9)104

Sensation and Measurement. H.R. Moskowitz, B. Scharf & J.C. Stevens, eds., (4)115

Service Management Reports. T.F. Powers, (12)79

Single-Cell Protein II. S.R. Tannenbaum & D.I.C. Wang, eds., (7)94

Some Methods for Microbiological Assay. R.G. Board & D.W. Lovelock, eds., (3)96

Soybeans as a Food Source. W.J. Wolf & J.C. Cowan, (4)121

Starch and Its Components. W. Banks & C.T. Greenwood, (4)116

Statistical Manual of the AOAC. W.J. Youden & E.H. Steiner, (3)96

Sugar Confectionery and Chocolate Manufacture. R. Lees & E.B. Jackson, (8)101

A Teaching Manual on Food and Nutrition for Non-Science Majors. D. Melnick, (7)96

Technology of Fortification of Foods. Proceedings of a Workshop. National Academy of Sciences, (11)112

That We May Eat. J. Hayes, ed., (4) 121

Thomas Grocery Register. Thomas Publishing Co., (4)116

Trade Names Dictionary. E.T. Crowley, ed., (12)74

Transport of Perishable Produce in Refrigerated Vehicles and Containers. International Institute of Refrigeration, (3)93

Water Relations of Foods. R.B. Duckworth, (12)78

What People Eat, An Introduction to Chemistry and Food Sciences. Revised ed. I. Raw, A. Bromley, E.R. Pariser & J. Vournakis, (10)148

World Food and Nutrition Study—Enhancement of Food Production for the United States. National Academy of Sciences, (10)145

World Guide to Technical Information and Documentation Services. 2nd ed. Unesco Press, (11)112

World Review of Nutrition and Dietetics. Vol. 23. G.H. Bourne, ed., (11) 110
